

Muhammad Wahyu Pratama

Full Stack Web Developer | React · Golang · PostgreSQL · Express

+62 823-7211-3442 | muhammad123wahyu123@gmail.com | [LinkedIn](#) | [GitHub](#)

Jakarta, Indonesia

PROFESSIONAL SUMMARY

Full Stack Web Developer with hands-on experience building modern web applications using React.js, Golang, Express and PostgreSQL. Experienced in developing RESTful APIs, designing relational databases, and implementing authentication and transaction workflows through real-world projects in an intensive software engineering bootcamp. Familiar with Docker, Git, Linux, and collaborative development workflows. Committed to writing clean, maintainable code while continuously improving technical skills and software engineering best practices.

PROJECTS

LamarLog | Personal Job Application Tracker [\[See More\]](#)

Personal Project

Built a personal full-stack web application to organize job applications across devices, track each application stage, and keep follow-up activity structured.

- Developed a responsive React.js frontend with authentication, protected routes, application CRUD, dashboard summaries, search, filters, and status-history views
- Built RESTful APIs with Node.js and Express.js, implementing JWT authentication, bcrypt password hashing, ownership isolation, and validation
- Integrated PostgreSQL and Sequelize ORM with database migrations and transactional application-status history
- Configured Vercel deployment for the frontend and API, with a Neon PostgreSQL database integration

Tech Stack: JavaScript, React.js, React Router, Tailwind CSS, Vite, Node.js, Express.js, PostgreSQL, Sequelize, JWT, bcrypt, Vercel

BrilianShop | Full Stack E-Commerce Web Application [\[See More\]](#)

Personal Project

Engineered a full-stack e-commerce web application that simulates a real-world online marketplace, supporting user authentication, product discovery, cart and wishlist management, checkout, order tracking, and administrative operations. Designed with a modular architecture and production-ready backend infrastructure.

- Architected a modular React.js frontend with reusable components, protected routing, Context API, and responsive UI using Tailwind CSS
- Developed RESTful APIs with Node.js & Express.js, implementing JWT authentication and role-based authorization
- Integrated PostgreSQL & Sequelize ORM with relational models, associations, and database migrations
- Integrated third-party services including Cloudinary for image storage and WebSocket-based real-time order updates
- Containerized and deployed the application using Docker, Docker Compose, and GitHub Container Registry
- Created API documentation using Swagger/OpenAPI and designed relational database models with PostgreSQL and Sequelize.

Tech Stack: JavaScript, React.js, React Router, Context API, Node.js, Express.js, PostgreSQL, Sequelize, JWT, WebSocket, Cloudinary, Multer, Docker, Docker Compose, GitHub Container Registry, Tailwind CSS

ShortLink — Full-Stack URL Shortener [\[See More\]](#)

Personal Project

A full-stack web application that allows authenticated users to create, manage, search, and access shortened URLs using custom or automatically generated slugs.

- Developed a responsive frontend using React, Tailwind CSS, and React Router, featuring authentication, link creation, search, pagination, and link management.
- Built RESTful APIs with Express.js, PostgreSQL, and Sequelize for authentication and user-specific URL management.
- Implemented JWT authentication, bcrypt password hashing, Zod validation, link ownership authorization, and soft deletion.
- Integrated Redis caching to improve link retrieval performance and applied cache invalidation after data changes.
- Added unique custom or automatically generated slugs, database transactions, permanent URL redirection, and Swagger API documentation.

Tech Stack: React.js, Tailwind CSS, Express.js, PostgreSQL, Sequelize, Redis, JWT, Zod, Swagger

PROFESSIONAL EXPERIENCE

Backend Developer Intern - NashTa Group

September 2026 - Present

Project: Electronics Point of Sale (POS) System

- Collaborated on a PostgreSQL database design covering users, electronic product catalogs, customers, transactions, payments, and inventory
- Prepared Sequelize migration scripts with UUID keys, foreign-key relationships, nullable fields, unique constraints, and soft deletes
- Created development seed data for roles, users, categories, brands, product variants, inventories, and payment methods
- Designed inventory movement tracking for sales, restocking, returns, and manual stock adjustments
- Contributed to API contracts for checkout, customer membership, transactions, payments, inventory, and monthly reports
- Used Git feature branches, GitHub, Trello, and Mermaid ERD documentation for team collaboration

Tech Stack: Node.js, Express.js, PostgreSQL, Sequelize, Git, GitHub

Full Stack Web Developer - Koda Tech Academy

May 2026 - August 2026

Depok, Indonesia

- Completed an intensive Full Stack Web Development bootcamp covering React.js, Golang, PostgreSQL, Docker, and RESTful API development
- Built multiple full-stack and backend applications, including an e-wallet system, contact management API, and e-commerce platform
- Designed relational databases and implemented authentication, transaction workflows, and CRUD operations using PostgreSQL and Golang
- Collaborated with peers through code reviews, problem-solving sessions, and project discussions while applying software engineering best practices
- Implemented Docker-based development and deployment, including containerized applications and PostgreSQL environments
- Collaborated with peers through code reviews, debugging, problem-solving sessions, and project discussions while applying software engineering best practices

Hostlive & Warehouse Staff - PT Yuanneng Farmer Mesin Indonesia

Feb 2025 - Feb 2026

Lampung, Indonesia

- Hosted live selling sessions to promote products and engage customers through social media platforms
- Created promotional content to support digital marketing campaigns and improve customer engagement
- Managed inventory, prepared outgoing shipments, and maintained warehouse organization
- Collaborated with team members to ensure operational efficiency and timely order fulfillment

Teaching Intern - Kampus Mengajar Batch 4

Aug 2022 - Dec 2022

Sumatera Selatan, Indonesia

- Assisted teachers in improving students' literacy and numeracy through classroom learning activities
- Supported school administration and documentation processes
- Developed digital learning media to enhance classroom engagement
- Participated in community education programs, including health awareness campaigns

Electrical Technician Intern - PT New Hope Indonesia

Aug 2017 - Oct 2017

Lampung Selatan, Indonesia

- Assisted electrical maintenance activities in factory operations
- Supported technicians during equipment inspection and repair

EDUCATION

Fullstack Web Developer Intensive Program - Koda Tech Academy

May 2026 - August 2026

Depok, Indonesia

- Frontend: React.js, Redux Toolkit, Tailwind CSS, JavaScript
- Backend: Golang, Gin Framework, PostgreSQL, Express
- DevOps: Docker, WSL, SSH for local deployment
- Database: PostgreSQL, SQL, Sequelize

- GPA: 3.60 / 4.00
- Student Executive Board (Religious Affairs Staff)
- English Student Association (Media Staff)
- Bujang Gadis Kampus (Organization & Cadre Division)

TECHNICAL SKILLS

Frontend: React.js, React Router, Redux Toolkit, React Query, JavaScript ES6+, Tailwind CSS, HTML5, CSS3, Responsive Web Design, Vite

Backend: Express.js, Golang, node.js, RESTful API, Repository Pattern, Authentication, Authorization, CRUD Operations

Database: PostgreSQL, SQL, Database Design, Sequelize, Database Migration

DevOps & Cloud: Docker, Docker Compose, GitHub Actions, GitLab CI, Linux CLI, SSH, Vercel, Netlify, Server Deployment

Testing: React Testing Library, Go Test, Unit & Integration Testing

API & Docs: RESTful API, OpenAPI, Swagger

Collaborations: Git, Github, Git Flow, Trello, Code Review, Team Collaboration

Security: Password Hashing, Session-based Authentication, Input Validation

Development Practices: MVC Architecture, JSON, Command Line Interface (CLI)
