PROFESSIONAL SUMMARY

Full Stack Web Developer with hands-on experience building modern web applications using React.js, Golang, Express and PostgreSQL. Experienced in developing RESTful APIs, designing relational databases, and implementing authentication and transaction workflows through real-world projects in an intensive software engineering bootcamp. Familiar with Docker, Git, Linux, and collaborative development workflows. Committed to writing clean, maintainable code while continuously improving technical skills and software engineering best practices.

PROFESSIONAL EXPERIENCE

Full Stack Web Developer — Koda Tech Academy

May 2026 – August 2026

Depok, Indonesia

- Completed an intensive Full Stack Web Development bootcamp covering React.js, Golang, PostgreSQL, Docker, and RESTful API development
- Built multiple full-stack and backend applications, including an e-wallet system, contact management API, and e-commerce platform
- Designed relational databases and implemented authentication, transaction workflows, and CRUD operations using PostgreSQL and Golang
- Collaborated with peers through code reviews, problem-solving sessions, and project discussions while applying software engineering best practices
- Implemented **Docker-based development and deployment**, including containerized applications and PostgreSQL environments
- Collaborated with peers through **code reviews, debugging, problem-solving sessions, and project discussions** while applying software engineering best practices

Hostlive & Warehouse Staff — PT Yuanneng Farmer Mesin Indonesia

Feb 2025 – Feb 2026

Lampung, Indonesia

- Hosted live selling sessions to promote products and engage customers through social media platforms
- Created promotional content to support digital marketing campaigns and improve customer engagement
- Managed inventory, prepared outgoing shipments, and maintained warehouse organization
- Collaborated with team members to ensure operational efficiency and timely order fulfillment

Teaching Intern — Kampus Mengajar Batch 4

Aug 2022 – Dec 2022

Sumatera Selatan, Indonesia

- Assisted teachers in improving students' literacy and numeracy through classroom learning activities
- Supported school administration and documentation processes
- Developed digital learning media to enhance classroom engagement
- Participated in community education programs, including health awareness campaigns

Electrical Technician Intern — PT New Hope Indonesia

Aug 2017 – Oct 2017

Lampung Selatan, Indonesia

- Assisted electrical maintenance activities in factory operations
- Supported technicians during equipment inspection and repair

EDUCATION

Fullstack Web Developer Intensive Program — Koda Tech Academy

May 2026 – August 2026

Depok, Indonesia

- Frontend: React.js, Redux Toolkit, Tailwind CSS, JavaScript
- Backend: Golang, Gin Framework, PostgreSQL, Express
- DevOps: Docker, WSL, SSH for local deployment
- Database: PostgreSQL, SQL

Baturaja, Sumatera Selatan

- GPA: 3.60 / 4.00
- Student Executive Board (Religious Affairs Staff)
- English Student Association (Media Staff)
- Bujang Gadis Kampus (Organization & Cadre Division)

TECHNICAL SKILLS

Frontend: React.js, Redux Toolkit, React Query, JavaScript ES6+, Tailwind CSS, HTML5, CSS3, Responsive Web Design, Vite

Backend: Golang, RESTful API, Repository Pattern, Authentication, CRUD Operations, Express

Database: PostgreSQL, SQL, Database Design

DevOps & Cloud: Docker, Docker Compose, GitHub Actions, GitLab CI, Linux CLI, SSH, Vercel, Netlify

Testing: React Testing Library, Go Test, Unit & Integration Testing

API & Docs: RESTful API, OpenAPI

Version Control: Git, GitHub, GitLab, Git Flow

Security: Password Hashing, Session-based Authentication, Input Validation

Development Practices: MVC Architecture, JSON, Command Line Interface (CLI)

PORTFOLIO

BrilianShop | Full Stack E-Commerce Web Application

Personal Project

Engineered a full-stack e-commerce web application that simulates a real-world online marketplace, supporting user authentication, product discovery, cart and wishlist management, checkout, order tracking, and administrative operations. Designed with a modular architecture and production-ready backend infrastructure.

- Architected a modular **React.js frontend** with reusable components, protected routing, Context API, and responsive UI using **Tailwind CSS**
- Developed **RESTful APIs with Node.js & Express.js**, implementing **JWT authentication** and role-based authorization
- Integrated **PostgreSQL & Sequelize ORM** with relational models, associations, and database migrations
- Implemented **Cloudinary** image uploads and **WebSocket** real-time order and status updates
- Containerized and deployed the application using **Docker, Docker Compose, and GitHub Container Registry**

Tech Stack: JavaScript, React.js, React Router, Context API, Node.js, Express.js, PostgreSQL, Sequelize, JWT, WebSocket, Cloudinary, Multer, Docker, Docker Compose, GitHub Container Registry, Tailwind CSS
